

Salvador García Delpech, MD, PhD

Consultant Ophthalmologist | Researcher | Healthcare Leader
Co-Director, Clínica Aiken, Valencia, Spain

Dr. Salvador García Delpech is an ophthalmologist with extensive experience in clinical practice, research, and medical education in the field of eye health. He graduated in Medicine and Surgery from the University of Valencia and obtained his PhD in Medicine with highest honors (cum laude). His professional career has focused on innovation in ophthalmology, particularly in refractive surgery, ocular surface disease, and contact lens-related technologies.

He currently serves as Co-Director and Consultant Ophthalmologist at Clínica Aiken in Valencia, Spain, where he combines clinical practice with healthcare leadership and strategic development. His work integrates advanced ophthalmic expertise with the management and improvement of healthcare delivery systems, with a strong focus on quality and innovation.

Dr. García Delpech has contributed to numerous research projects and is the author of multiple scientific publications in national and international peer-reviewed journals. He is actively involved in postgraduate education and professional training, supporting the development of ophthalmologists and healthcare professionals through academic and clinical teaching.

In addition to his clinical and academic work, he leads the Aiken Foundation, a non-profit organisation dedicated to improving access to eye care for underserved populations through humanitarian initiatives and outreach programmes.

His main areas of interest include refractive surgery, ocular surface disease, contact lenses, and the application of artificial intelligence in ophthalmology.
